Proposal for a flag for Seba Beach

Hello, my name is [redacted] 16 and my family has spent our summers at our cabin in Seba Beach since before I was born. I am interested in flags and I noticed that Seba Beach does not have one. Other similar places that have flags are nearby Wabamun & Alberta Beach as well as the Summer Villages of Horseshoe Bay, Sunset Point, and Crystal Springs. My flag design is a tricolour with a 1:2 proportion; the same as the Canada flag, with colours being (from left to right): Yellow (HEX #FFE93C), White (HEX #FFFFFF), and Blue (HEX #1C6BB6). The yellow represents Seba's sandy beaches and the blue represents the water of Wabamun Lake. I chose to make the colours of the flag slightly toned down to make the flag more aesthetically appealing. In the middle of the flag I have a crest (like the one on the Alberta flag) with the text "Summer Village of Seba Beach" above and below it in the font Coolnetica, which is free for commercial and public use. At the top of the crest (coloured HEX #128EFE) there is a yellow sun, representing Seba's sunny summer days. On it's left is a Yellow Warbler which is a very common bird in the spring & summer in Seba and is a cheery and busy bird, which aptly represents the busy and friendly summers. On the right is a Black-capped Chickadee, another very common bird that stays in Seba Beach year-round representing Seba's year-round residents and calm winters. Below is a stylized scene that you would see on an average day in Seba Beach, with a light blue sky (HEX #6DD7FF) behind a row of green trees (HEX #044A05) with a yellow sandy beach and calm blue water. In the foreground is a white sailboat heading in the "Right" direction, representing Seba Beach's many recreational activities as well as its ties to the sailing community through the Edmonton Yacht Club. Finally below that is a yellow area with the year 1920 in the middle. This was the year that Seba Beach incorporated, and represents Seba's historic ties and commitment to remembering its past through the Seba Beach Museum.

Those strings of numbers and letters in brackets are HEX colours, which are specific codes for each colour, which allows me to give exact colours.
